Abstract

Improving the quality of Civil Servants aims to change their behavior to be more capable of carrying out activities in all fields, because basically human behavior can achieve the goals to be achieved. Therefore, it is necessary to develop human resources in our country considering the large population of Indonesia, which is a potential productive source so that it can be turned into a real productive source for the Technical Implementation Unit for Road and Bridge Management. Quality employees according to Sumual (2017: 8) will facilitate the work unit in achieving its goals, both in terms of dedication and service.

Performance can be influenced by the encouragement or motivation of employees to be willing to work harder, work ethic in accordance with loyalty or a strong sense of love for the values and goals of the organization, and organizational culture that can trigger or stimulate employee performance to be better. Robbins and Judge (2015: 358) state that a strong culture will have a great influence on the behavior of its members because the high level of togetherness and intensity creates an internal climate of high behavioral control. The work ethic according to Sinamo (2014: 23) is the work ethic is the spirit, enthusiasm, and mentality that manifests into a set of positive work behaviors. Simple motivation according to Hasibuan (2017:141) can be formulated as things that cause, channel, and support human behavior, so that they are willing to work hard and enthusiastically achieve optimal results.

Analysis data technique used in this research is quantitative analysis using SEM (Structural Equation Modeling) model or Structural Equation Model with AMOS 23.0 program. The result of this research is the regression between organizational culture and work motivation, the CR value (Critical Ratio) is 5.720. The regression between organizational culture and employee performance has a CR (Critical Ratio) value of 2,508. Between work ethic and work motivation, the CR (Critical Ratio) value is 2,345. Between work ethic and employee performance, the CR (Critical Ratio) value is 1.961. Between work motivation and employee performance, the CR (Critical Ratio) value is 4.298.

Keywords: Organizational Culture, Work Ethic, Work Motivation, Employee Performance

Background

Human resources are very important asset for the company. By having quality human resources, the company is

expected to have the opportunity to win the competition and be able to achieve success. Improving the quality of human resources is a definite need in line with the implementation of regional autonomy.

Improving the quality of Civil Servants aims to change their behavior to be more capable of carrying out activities in all fields, because basically human behavior can achieve the goals to be achieved.

Quality employees according to Sumual (2017: 8) will facilitate the work unit in achieving its goals, both in terms of dedication and service. To realize optimal employee performance as expected according to Ravianto in Sumual (2017: 119) argues that performance can be influenced by the encouragement or motivation of employees to be willing to work harder, work ethic that is in accordance with loyalty or a strong sense of love for values. Organizational values and goals, and organizational culture that can trigger or stimulate employee performance to be better.

Robbins and Judge (2015: 358) state that a strong culture will have a great influence on the behavior of its members because the high level of togetherness and intensity creates an internal climate of high behavioral control. The work ethic according to Sinamo (2014: 23) is the work ethic is the spirit, enthusiasm, and mentality that manifests into a set of positive work behaviors.

Simple motivation according to Hasibuan (2017:141) can be formulated as things that cause, channel, and support human behavior, so that they are willing to work hard and enthusiastically achieve optimal results.

Based on the background of the problem above, the research is interested in researching: The influence of organizational culture, work ethic on work motivation and employee performance at the Surabaya Road and Bridge Management Unit.

Theoretical Basis

Organizational Culture

Robbins and Judge (2015: 355) Organizational culture concerns how members see the organization, not whether members of the organization like it or not, because members absorb organizational culture based on what they see or hear in the organization. The seven characteristics of organizational culture are as follows:

1. Innovation and RiskTaking
2. Attention To Detail
3. Outcome Orientation
4. People Orientation
5. Team Orientation
6. Aggressiveness
7. Stability

Work Ethic

Work ethic according to Jansen Sinamo (2005: 26), is a set of positive behaviors rooted in fundamental beliefs accompanied by a total commitment to an integral work paradigm.. Work Ethic of five indicators, namely:

1. Enthusiastic
2. Enjoying Work
3. Fully dedicated
4. Excited
5. Ability to learn

Work Motivation

Robbins and Judge (2015: 127) define motivation as a process that produces an individual intensity, direction, and persistence in an effort to achieve a goal. Work Motivation includes five indicators, namely:

1. Physiological Needs
2. Safety and security

3. Belongingness
4. Esteem
5. Self-actualization

Employee Performance

Wibowo (2010:4) Performance is the implementation of the plans that have been prepared. Performance has five indicators as follows:

1. Work quality
2. Work Quantity
3. Punctuality
4. Effectiveness
5. Independence

Conceptual Framework and Hypotheses

Figure 1.1
Conceptual framework

- H1:** Organizational culture has a significant effect on work motivation of UPT Surabaya Road And Bridge Management.
- H2:** Organizational culture has a significant effect on employee performance UPT Surabaya Road And Bridge Management .
- H3:** Work ethic has a significant effect on work motivation of UPT Surabaya Road And Bridge Management employee.
- H4:** Work ethic has a significant effect on the performance UPT Surabaya Road and Bridge Management employees
- H5:** Work motivation has a significant effect on employee performance.

Research Methods

This research is a quantitative research with a descriptive approach. Researchers use Saturated Sampling. The population in this study are employees at UPT Surabaya Road and Bridge Management office who occupy positions as civil servants, PTT-PK and outcourcing workers.

Data collecting used a Likert scale 1-5 questionnaire and processed using SPSS to counting from validity and reliability, this research model using SEM with the AMOS version 23 application program.

Results and Discussion

Validity test

Validity test the usage correlation of pearson product moment (r). If the correlation price from count r on every declaration question produces have significant (sig.) more then less 5% and statement from this question is patent.

Each indicator in each variable has a significance value less than 0.05, so it can be said that all statement items used to measure each indicator in each variable are valid

Reliability Test

Table 1.1

Reliability Test Results

Variabel	Cronbach's Alpha	Keterangan
Organizational Culture (X1)	0,789	Reliable
Work ethic (X2)	0,689	Reliable
Work Motivation (Z)	0,731	Reliable

Variabel	Cronbach's Alpha	Keterangan
Employee Performance (Y)	0,746	Reliable
Rule of thumbs	41	$\geq 0,60$

The reliability test used **correlation (r)** Pearson's product moment that this correlation r have more statement to produces the subject than r table have a significant value (sig.) and have less than 5% subject this research is reliable.

Descriptive Analysis Result

Table 1.2
Statistic Descriptive

Variabel	Item	Frekuensi Jawaban					Mean Item	Mean Indicator
		STS	TS	Ks	S	SS		
Organizational Culture	X1.1	0	0	6	200	270	4,491	4,462
	X1.2	0	0	6	224	240	4,434	
	X1.13	0	4	63	224	135	4,019	
	X1.14	0	0	24	232	200	4,302	
Work Ethic	X2.19	0	0	21	276	150	4,217	4,321
	X2.20	0	0	9	220	240	4,425	
	X2.21	0	0	27	248	175	4,245	
	X2.22	0	4	57	256	105	3,981	
Work Motivation	Z1.25	0	0	6	276	175	4,311	4,274
	Z1.26	0	0	30	244	175	4,236	
	Z1.29	0	0	36	276	125	4,123	
	Z1.30	0	0	21	264	165	4,245	
Employee Performance	Y1.35	0	0	18	204	245	4,406	4,392
	Y1.36	0	0	18	216	230	4,377	
	Y1.43	0	0	33	272	135	4,151	
	Y1.44	0	0	15	188	270	4,462	

The descriptive analysis result of this study:

1. The average organizational culture very high

2. The average work ethic rate as low
3. The average value of the work motivation variable is very low
4. the average value of the employee performance variable is the second highest of all variables

Oulier Test

SEM is a multivariate method that combines aspect analysis and regression evaluation which allows researchers to simultaneously see the interrelated effects of signs in measuring latent constructs looking at the chain of relationships for the involvement of other latent constructs.

Model fit result

Table 1.4

Overall Model Goodness of Fit Score

Indicator	Cov	Estimate	Descript
Chi-square	0,05	34,53	Good fit
Sign	0,05	0,408	Good fit
CMIN/df	2,00	1,032	Good fit
RMSEA	0,08	0,017	Good fit
TLI	0,95	0,997	Good fit
CFI	0,95	0,998	Good fit
GFI	0,90	0,921	Good fit
AGFI	0,90	0,878	Marginal fit

The table seen that evaluation of the suitability model to measurement outcomes in displaying the index values which all suitable. Then method precise suit that model already have an excellent fit. Marginal fit is version continues to be inside the perfect limits of version suitability.

Figure 1.2
Overall Model

Tabel 1.5
Hypothesis Testing

			Estimate	C.R.	P	Keterangan
Budaya Organisasi	-->	Motivasi Kerja	0,787	5,720	,000	Signifikan
Budaya Organisasi	-->	Kinerja Karyawan	0,198	2,508	,012	Signifikan
Etos Kerja	-->	Motivasi Kerja	2,116	2,345	,019	Signifikan
Etos Kerja	-->	Kinerja Karyawan	0,189	0,691	,489	Tidak Signifikan
Motivasi Kerja	-->	Kinerja Karyawan	0,527	4,298	,000	Signifikan

Discussion

The magnitude of the influence between these variables is used to show and explain the strong influence of the X variable on Z, the X variable on Y, and the Z variable on Y as evidenced by the magnitude of the influence value.

Organizational Culture has a positive and significant effect on work motivation, these results are consistent with the opinion of Robbins and Judge (2015: 358) which states that a strong culture will have a great influence on the behavior of its members because the intensity creates an internal climate of high behavior control. Organizational culture has an effect on employee performance. This is consistent with the opinion of Gibson in Tewel et al (2017: 19), Organizational culture is what employees feel and how this perception creates a pattern of beliefs, values and expectations. employees or employees as the driving force of the organization's operations, if the employee's performance is good, the organizational performance will also increase.

Work ethic has an effect on work discipline, meaning that it is higher. This is consistent with Jansen Sinamo (2005: 26), Work Ethic is a set of positive behaviors rooted in fundamental beliefs accompanied by a total commitment to an integral work paradigm. Work ethic has an effect but not significant on employee performance. similar to the opinion of Hadiansyah Andri and Rini P Yanwar (2015) that every person must be equipped with the potential and competence to fulfill his soul calling. If the work is in accordance with the calling of his soul, the employee will have a good performance. So it was concluded that the employees of the Surabaya Road and Bridge Management UPT work not because of their soul calling, but because of various other aspects of their work ethic.

Work motivation has a significant and influential effect on employee performance. The results of testing the hypothesis are consistent with Hasibuan's (2017:141) opinion. Motivation is the thing that causes, distributes, and supports human behavior, so that they want to work hard and enthusiastically achieve optimal results.

CONCLUSIONS AND SUGGESTIONS

The conclusions of this research is:

1. Organizational culture has a significant effect on work motivation at the UPT Surabaya Road and Bridge Management.
2. Organizational culture has a significant effect on employee performance at the Surabaya Road and Bridge Management Unit.
3. Work ethic has a significant effect on employee motivation at the Surabaya Road and Bridge Management Unit.
4. Work ethic has no significant effect on employee performance at UPT Surabaya Road and Bridge Management.
5. Work motivation has a significant effect on employee performance at the Surabaya Road and Bridge Management Unit.

Suggestions to agencies are:

1. Creating a program for stimulus in increasing the work ethic of employees by fostering a sense of love, sincerity, working hard with integrity in doing the work of each employee in order to achieve the goals agency.
2. improve supporting facilities in various programs to complement work activities in each section of the UPT Surabaya.

Suggestions for research development are:

1. Research on the use of other variables such as, work discipline,

income, remuneration, this is intended to be achieved in t²³ development and generalization of organizational culture, work ethic, on work motivation and employee performance

2. Future research is recommended to use data collection methods equipped with qualitative analysis. The findings obtained in this study can be used as a consideration and input for developing further research
