ABSTRACT

Speech acts can be found in human life in the form of daily conversation and also in short stories, movies, speeches, or novels. The purpose of this study is to identify the kinds of illocutionary acts used by Kim namjoon and to know the actual functions of illocutionary force in speech. A descriptive qualitative method is employed in this study to collect data and identify the utterances by Searle's (1976) illocutionary act theory. The data were collected from Kim Namjoon's speech transcript. The results show, that there are 29 utterances containing illocutionary acts, which are representative of 12 utterances, directive 7 utterances, expressive 8 utterances, and commissive 3 utterances. The actual functions of the utterances found are representative: explaining, informing, reporting, claiming, and describing, expressive: thanking, expressing gratitude, expressions of happiness, expressing concern, and expressing sadness, directive: commanding, inviting, ordering, asking, and requesting, commissive: promising.

Keywords: kim namjoon, illocutionary acts, searle
