Lampiran 4. Tabulasi Skala *Homesickness*

The screenshot shows the 'B00' worksheet in Microsoft Excel. The spreadsheet is a grid of data points, likely representing scores for the 'Homesickness' scale. The columns are labeled with letters from A to SC, and the rows are numbered from 1 to 30. The data is organized into a structured format, with each cell containing a numerical value, possibly representing a score or frequency. The values are mostly integers between 1 and 5, with some cells containing 0 or 6. The layout is consistent with a Likert scale or a similar measurement tool.

The screenshot shows the 'B01' worksheet in Microsoft Excel, continuing the data from the previous sheet. The columns are labeled with letters from A to SC, and the rows are numbered from 30 to 60. The data is organized into a structured format, with each cell containing a numerical value, likely representing a score or frequency. The values are mostly integers between 1 and 5, with some cells containing 0 or 6. The layout is consistent with a Likert scale or a similar measurement tool.

This screenshot shows a Microsoft Excel spreadsheet with a red header row. The spreadsheet contains a grid of data with columns labeled A through BC and rows numbered 86 through 101. The data appears to be a sequence of numbers, possibly representing a calendar or a specific data set. The interface includes the standard Excel ribbon with tabs for Home, Insert, Page Layout, Formulas, Data, Review, and View. The status bar at the bottom indicates the file name 'Formulas.xlsx' and the current cell 'V 30 101'.

This screenshot shows another Microsoft Excel spreadsheet, similar to the one above, with a red header row and a grid of data. The columns are labeled A through BC and the rows are numbered 72 through 101. The data consists of numbers arranged in a regular pattern. The Excel interface is visible, including the ribbon and the status bar at the bottom, which shows the file name 'Formulas.xlsx' and the current cell 'V 30 101'.
